

Humana FastApp makes fast work of closing MedSupp sales

FastApp is the sales tool that combines four big benefits

1. It's easy

Sign in to the Humana agent site—Vantage—via **Humana.com**, and select Enter FastApp. Enter your client's ZIP code and search for plans available in that area. The main enrollment screen gives you immediate updates on active policies, inactive policies and pending applications.

2. It's accurate

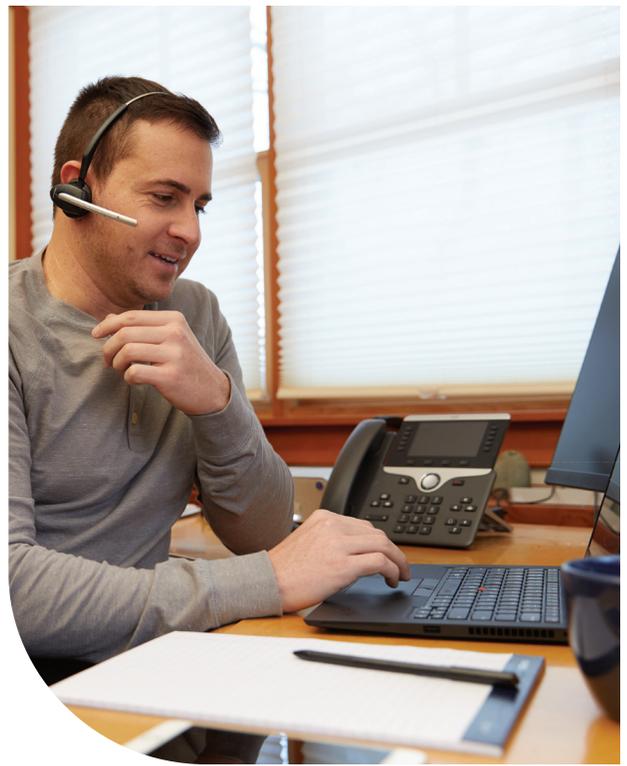

Just answer all the questions. FastApp helps you enter your client's information correctly for smooth, speedy processing.

3. It's quick

Straightforward, easy-to-answer questions allow you to complete an application in about 10 minutes. And e-applications can be processed up to twice as fast as paper applications.

4. It's submitted immediately

The quickest signature method is using IVR. With interactive voice recording (IVR), the client signs the application by voice. It's instant—the application is submitted immediately. You'll find a walk-through of how this works in Humana's MarketPoint University in Vantage. Simply search Med Supp FastApp once in Marketpoint University to view.

If you have nonurgent requests or questions, email agentsupport@humana.com.

If you have urgent requests or questions, please call us at 1-800-309-3163.
